

# Frequently Asked Questions

## NOB glasfiber network in the Netherlands

001-2822005/2

---

### Question

Is there a possibility for a direct connection to Hilversum without the use of a SNG?

### Answer

Yes there is. The NOB (Nederlands Omroep Bedrijf) maintains a glasfiber network throughout the Netherlands that is capable of high quality video & audio transmissions to Hilversum (and from there throughout the world).

In all of the following 18 football-stadiums there is a connection-point capable of transmitting at least three video-channels with each four audio channels simultaneously. These connections are only capable of handling digital (SDI-based) video with embedded audio or separate analog audio.

City	Stadium of
Amsterdam	AFC AJAX
Alkmaar	AZ
Almelo	Heracles
Arnhem	Vitesse
Breda	NAC
Den Haag	ADO Den Haag
Eindhoven	PSV
Enschede	FC Twente
Groningen	FC Groningen
Heerenveen	SC Heerenveen
Kerkrade	Roda JC
Nijmegen	NEC
Roosendaal	RBC Sparta
Rotterdam	Feyenoord
Rotterdam	Sparta
Tilburg	Willem 2
Utrecht	FC Utrecht
Waalwijk	RKC Waalwijk

### How can I use this?

First of all you should contact NOB-MCR for availability and bookings. Call MCR (24 hours staffing) at +31 (0)35 6773349.

For video you need an either a SDI converter to convert the CVBS-video to SDI or an optional SDI output board in your camcorder (depending on your camcorder).

For audio though you need a cable with female-XLR 's at the end. So a standard XLR-cable want do!

If needed, you can order the required audio cable under article number 2014693.

For advise on what is the best option for your setup, don't hesitate to contact us so we can help you.
